REASONS FOR ALLOWANCE

Claims 2-3 and 5-21 are allowed.

1. The following is an examiner's statement of reasons for allowance: Prior art fails to teach or fairly suggest an automatic analyzer including a reagent vessel, a pipette probe that has a liquid surface detection function and dispenses a reagent from the reagent vessel and a reaction vessel for containing a reagent that is dispensed from the pipette probe. The automatic analyzer further includes an analysis mechanism for measuring a reaction between a reagent and a sample with the reaction vessel and storage means for memorizing liquid surface position information that is acquired by the liquid surface detection function. The analyzer further includes a liquid surface estimation mechanism for estimating the current liquid surface height derived from an approximate formula curve based on liquid surface height changes that occur during a period of the first several tens of test for analysis. The analyzer further includes a mechanism for automatically adjusting the liquid surface estimation result estimated by the liquid surface estimation mechanism based on an amount of a carryover that remains on the out circumferential surface of the probe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
